FRAMESAVER® DOOR FRAMES

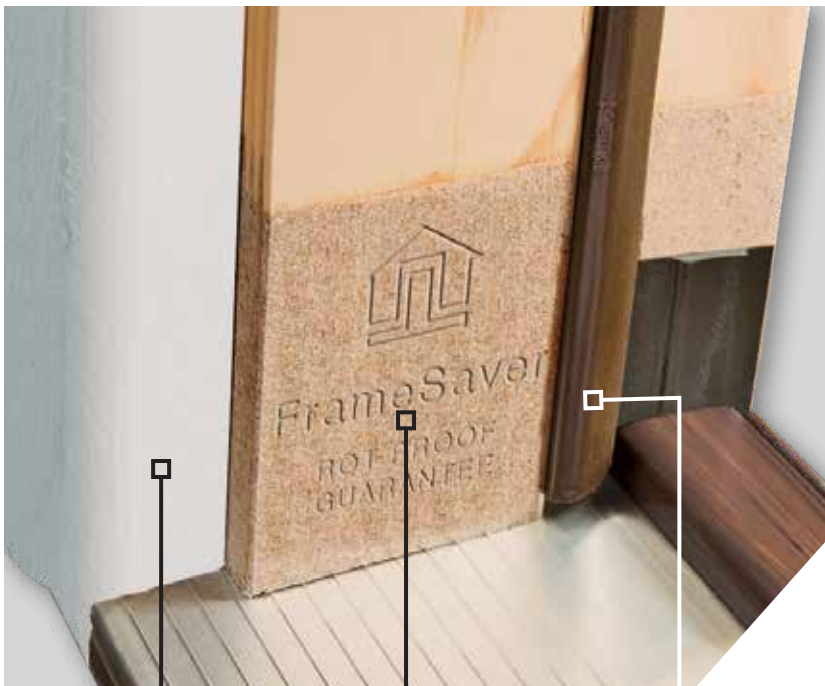

FrameSaver Door Frames are simply the best wood frames on the market. They provide the ultimate in performance, as the only rot-proof composite bottom wood door frame. Backed by a fully-transferable limited lifetime warranty, FrameSaver's composite bottom never absorbs water, warps, cracks or rots. FrameSaver is made of finger-jointed wood, giving it extra strength. It can also be painted or finished just like wood.

Z-SERIES SILL SYSTEMS

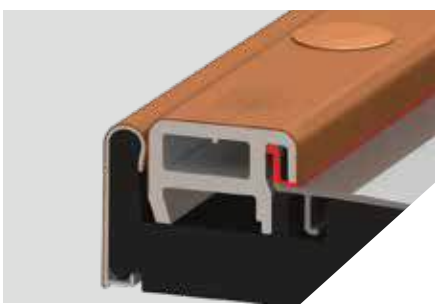

Using a patented design of all-synthetic components, the Z-Series Sill eliminates the worries of wood. Built to last, Z-Series Sills protect your entry from unsightly damage, rusted screws, discoloration, deformity, gaps and dents.

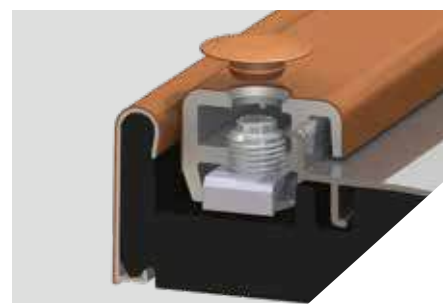

INSWING SILLS

COMPOSITE SUBSTRATE
No more stuck doors or drafts because the Z-Series Sill substrate material is a waterproof composite that won't warp or rot, ever. The substrate is not affected by moisture and rot like wood.

HIGH DAM, INTEGRATED SEAL
A dual durometer cap seal overlaps the high dam. Both combine to provide a barrier to air and moisture even in the most extreme weather conditions.

SEALED ADJUSTMENT SCREWS
Dirt and water can get into the exposed screws of other adjustable sills. Patented sealing plugs hide unsightly screws and keep water and dirt away from the adjustment mechanism, maintaining adjustability of the sill.

OUTSWING BUMPER SILLS

Z-Series Bumper Outswing Sills offer the ultimate protection in high exposure areas and severe weather conditions. The seal produced by the Bumper Outswing increases with pressure against the door, for enhanced protection against air and water.

ADA COMPLAINT SILLS

Enhanced accessibility doesn't have to mean a compromise in protection. With ADA Compliant Sills Powered By Endura™, you can deliver the best of both.

Flip Lever Astragals

FRENCH DOOR SOLUTIONS BY ENDURA

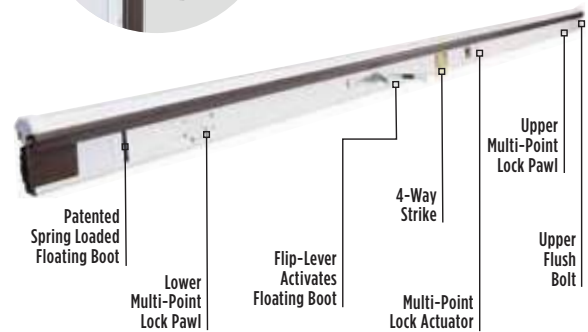

ULTIMATE FLIP LEVER™ ASTRAGAL

Effortless Operation. Ultimate Performance. Endura's Flip Lever Astragals deliver superior sealing power and security combined with effortless operation. One flip is all you need to secure your inactive door and keep leaks at bay.

- ▶ **Effortless One-Flip Operation. Enhanced Accessibility:** A single flip of the built-in lever activates both bolts and secures the door. No reaching or bending necessary.
- ▶ **Ultimate Security:** When each of the astragal's bolts are engaged, the inactive door is secured in place. No extra locking steps necessary.
- ▶ **Extended Sealing Power:** Spring-loaded Floating Boot, Simple Solution® Corner Pad and weatherstrip get an added boost with a full-length Sealing Fin for an extra layer of protection against air and water infiltration.
- ▶ **4-Way Adjustable Strike Retainer**

Easy Flip Operation

FLIP LEVER UP

Raising the flip lever retracts both bolts. The Spring-loaded Floating Boot lifts clear of the sill preventing wear and damage for problem-free use of the inactive door.

FLIP LEVER DOWN

Lowering the flip lever activates both bolts. The Spring-loaded Floating Boot securely seals, independently of the bolt, against the sill fighting air and water infiltration, even in imperfect conditions.

MULTI-POINT (MPA) ASTRAGAL

Multi-Point Sealing Without the Multi-Point Price Tag. Endura's Ultimate Multi-Point Astragal combines all the features of the Ultimate Flip Lever™ Astragal with the added benefit of multi-point locking built right into the astragal.

- ▶ **Multi-Point Performance:** With two additional locking points built into the astragal, MPA provides multi-point performance without requiring the added purchase of a multi-point lock, delivering exceptional value and savings.
- ▶ **Works with Standard Deadbolt Packages:** No special hardware required.
- ▶ **Fights Deflection:** Typical French door installations only hold the door panels together at one point...the deadbolt. This permits door panel deflection, and air and water infiltration. MPA's two additional locking points, prevent deflection and resulting leaks.
- ▶ **Additional Sealing Features:** MPA boasts the same weathersealing features as the Flip Lever Astragal, plus the added performance of two additional locking points to fight leaks at every possible source.

Many transom shapes exist. Please see Masonite's glass price guide for a complete list with full dimensions.

All dimensions shown are for inswing doors. Deduct 1-1/8" from the actual door unit size, the rough opening size and the outside brickmold size height for outswing. For handicap accessible doors, see product selection detailed in the catalog to determine if the entry door style you have selected is available. Recommended rough openings for the Entry Fit™ adjustable steel frame offering are different than the dimensions shown in this chart (See rough opening chart titled Entry Fit™). Floor covering can affect rough opening heights. *Height dimensions shown are for 79" and 95" tall doors with 1-3/8" sills. For variations, adjust accordingly.
